Clinical Psychology Services

North West England, the Isle of Man and North Wales
Cleft Lip and Palate Network
This leaflet provides information about the Cleft Lip and Palate Clinical Psychology Service which we hope you will find helpful. Your Cleft Lip and Palate Team is concerned about the physical and psychological well-being of your child and there may be things that we can help you with.

What is a Clinical Psychologist?
A Clinical Psychologist is someone who has studied behaviour and feelings. They use this knowledge to try to understand the problems that children and their families may be having, and suggest different ways of trying to help.

What can we help with?
A member of the Cleft Lip and Palate Team may offer a referral to Clinical Psychology or you can request Clinical Psychology support. We can help with:

- Adjusting to the news that your child has a cleft lip and/or palate and any worries after antenatal diagnosis or at the time of the birth.
- Concerns about what to say to other people and how to deal with their reactions and questions.
- Making decisions about treatment and surgery.
- Worries about having a cleft lip and/or palate and preparation and support for surgery including worries about operations or treatments.
- Adjusting to the outcome of medical assessments, treatments and procedures, including support after surgery.
- Difficulties in friendships or other relationships.
- Difficulties in social situations or in talking to people.
- Low mood.
- Behavioural problems.
- Starting school, moving to secondary, leaving school and applying for jobs.
• Bullying and teasing
• Concerns about appearance

How can we help?
• We can offer individual appointments where we discuss any worries you and/or your family have and ways you can manage them. We can provide counselling, therapy and support for you and your family about anything related to your child’s cleft lip and/or palate.
• We are able to talk (with your consent) with other agencies that you are involved with, for example school, social services, other medical teams. This can be helpful if there are several professionals involved with your child’s care as it can be difficult to find time to contact everyone and get a good idea of your child’s progress.

Who are the Clinical Psychologists in my Cleft Team?
There are several experienced Clinical Psychologists who work as part of the Cleft Lip and Palate Team. Assistant Clinical Psychologists support the work of the Clinical Psychologists and evaluate the service we provide and there are sometimes trainee Clinical Psychologists on placement within the team.

Frequently Asked Questions

How do we see a Clinical Psychologist?
There are a number of ways this can be arranged. You can talk to any member of the Cleft Lip and Palate Team when you come to clinic. Clinical Psychologists are part of this team and are generally present in clinics but any member of the team will be happy to put you in touch with us. You can also contact us directly, Monday to Friday, 9.00 am to 5.00 pm by telephoning the Clinical Psychology Department at either Alder Hey Children’s Hospital (0151 252 5586) or Royal Manchester Children’s Hospital (0161 701 5683).
Will I have to wait to see a Clinical Psychologist?

We aim to offer an initial appointment within 8-12 weeks. We try to be as flexible as possible with appointment times. However, if the date or time of your appointment is inconvenient please let us know so that we can rearrange it.

What will happen at the first appointment?

The first appointment will usually last about an hour. We will talk about any current difficulties as you and your child see them and about the family in general. We may also ask questions about your family’s history, the early development of your child and about school. This will help us build up a picture of any issues you face. The Clinical Psychologist will usually want to spend some time talking to your child alone, perhaps using activities such as drawing or play. However, this may happen at a later session.

As well as the Clinical Psychologist asking you questions, you can ask questions if there is anything you are unsure about. At the end of the first session, we will try to plan the next steps to help resolve any difficulties. This may involve asking you to keep records of your child’s problem, or asking permission to contact other people such as Doctors, Nurses or Teachers who have had a lot of contact with your child.

Will we need to come and see a Clinical Psychologist separately from our other appointments?

Not necessarily. We try to co-ordinate appointments with other appointments that you have. Sometimes you might prefer a separate appointment to concentrate on an issue. How often you and your child see us will be agreed individually.
Where will we be seen?
The Clinical Psychology service offer appointments at the Children’s Hospitals in Manchester and Liverpool and also within the outreach settings at the Royal Preston, Glan Clwyd and Wrexham Maelor hospitals. However, if you have a problem getting to these locations please let us know and we will see if we can help.

Do Clinical Psychologists ever come to the home?
Occasionally, if it is felt to be more appropriate or helpful to the child or young person and their family to be seen in the home then this can be arranged. The individual needs of your child and family can be discussed in a one-to-one meeting with us.

Will the Clinical Psychologist meet the whole family?
Sometimes it can be helpful to meet with all members of the family together. However, there is no obligation to include all family members. We discuss with those attending whether it might be helpful to include other family members.

Do Clinical Psychologists see children separately from their parents?
This will always be done in full discussion with parents. Depending on the age and confidence of the child, it can sometimes be helpful to see children separately. Older children and teenagers will be offered the chance to be seen on their own.

Confidentiality and Consent
- Confidentiality and consent will be discussed with you at your first meeting and you will have the opportunity to ask any questions you or your child may have.
• All information that you share with us is treated confidentially unless there are concerns that someone’s safety is at risk.

• Letters are exchanged between members of the team so that we can provide you with the best quality care. Copies of letters are also sent to your child’s GP and Community Paediatrician. However, if there is information that you do not want to be shared with the rest of the team you can talk to the Clinical Psychologist about this.

• You will be given the opportunity to receive copies of any letters written by the Clinical Psychologist about your child.

Suggestions/Comments
The staff are here to help and it is important for them to know if you have any comments or suggestions about the services you have received. If you wish to speak to a member of the cleft team please telephone us:

Liverpool: 0151 252 5209
Manchester: 0161 701 9091
